

# SMITH EYE ASSOCIATES

We are now offering, a new highly sophisticated digital laser scanner that allows us to provide you with a more thorough medical analysis of your eye. The Optomap Retinal Scan System takes a very detailed retinal image of the back of the eye. This procedure assists Dr. Smith in the early detection of many eye disorders, or diseases, such as Glaucoma, Diabetic Retinopathy, Macular Degeneration, Retinal Tears or Detachments and other threatening conditions to the eyes. **If a patient is sensitive to the affects of Dilation, WE HIGHLY RECOMMEND being scanned, this will allow Dr. Smith the opportunity to view the back of the eye health, while lowering the chances for use of dilation.**

- The Optomap Retinal Scan is fast, easy and comfortable.
- Dr. Smith will review your images with you today during your exam.
- We also keep your images on record as a baseline for tracking and diagnosing potential eye diseases now or in the future.

There is an additional charge of \$25.00 for this procedure. **If a diagnosis is made, Insurance MAY cover the cost.** Please check the appropriate line below and sign at the bottom.

\_\_\_\_\_ YES, I DO want the procedure performed.

\_\_\_\_\_ NO, I DO NOT want the procedure performed.
